1	Inès Lerouge	Inès Lerouge	The Blue Dye Present in an Example of Food and in Nature.	First we will determine the dye present in a Schtroumpf candy and check that it corresponds to that indicated in the ingredients. Then we will determine the mass of this dye in a Schtroumpf candy and compare it to the acceptable daily intake. In a third time, we will present the natural blue dyes and we will extract it. Finally we will try to make a candy with this natural dye.	Franck Vi Emmanuel Bosseaux
